

# FAIRification of RNAseq Data

A hands-on workshop for RDM professionals · 45–60 min

Worked dataset: Alivernini et al. 2020 · ArrayExpress **E-MTAB-9224**

## The FAIR Principles

- **F — Findable** · persistent IDs, rich indexed metadata
- **A — Accessible** · open standard protocols (HTTPS)
- **I — Interoperable** · shared vocabularies / ontologies
- **R — Reusable** · licence, provenance, community standards

## Finding the data — F1 & F4

- **F1** — the accession `E-MTAB-9224` is a globally unique, persistent ID
- **F4** — indexed in ArrayExpress, findable by keyword

**Where your researchers should deposit:** `[ your institution's preferred repository ]`
